XML Databases

Oracle XML DB

Oracle XML DB in Oracle database server provides `XMLType` object data-type which can be utilised in tables (as a column type) or as type of a table (to store only XML data).

See details on Oracle XML DB [oracle/].

PostgreSQL XML Type

PostgreSQL defines XML type [https://www.postgresql.org/docs/current/static/datatype-xml.html] and XML functions [https://www.postgresql.org/docs/current/static/functions-xml.html] with indexing limited to full-text or particular XPaths [https://wiki.postgresql.org/wiki/XML_Indexing].

See details on PostgreSQL XML [pgsql/].
